from new york times bestselling author conn iggulden the second novel in this new trilogy finds newly crowned emperor nero fending off court rivals while embracing his fate as the most feared notorious ruler in roman history ancient rome 50 ad agrippina secures her son lucius s fate through her marriage to emperor claudius though more intelligent than her previous husbands and with a power that is absolute for a time she bends her husband to her will claudius is gentle as a lamb with a rope around its neck so it is that lucius is adopted into the imperial family and becomes nero claudius caesar augustus germanicus but this is merely the first of many moves in the game of power as mother and son risk everything their alliances and betrayals their cruelties and crimes their brilliance and their ambition this vivid tapestry is brought brilliantly to life by conn iggulden in tyrant

design education and practice are inherently social from process to implementation this book explores the transformation in design education as educators prepare their students to address complex social design problems for all people in society this seven chapter volume provides the reader with a range of viewpoints on the role of design education in shaping the world the book begins with the overarching potential of design to address the needs of an increasingly complex society and the importance of worldview that underpins education methodology each chapter addresses a context that varies by discipline architecture graphic packaging and interior design and location nigeria canada lebanon uk and usa the authors pull back the curtain on

their educational methods and provide the reader with a candid view of their teaching outcomes the needs of the marginalized victims of asian hate students with dyslexia tomato farmers and even design students themselves are brought into focus here these specific places and peoples provide a design context that can be translated to other situations in design education and practice design educators and practitioners of many design disciplines will benefit from the philosophical discussions and the practical education examples offered here this volume can contribute to transforming design education that will one day transform design practice to place a greater emphasis on the needs of the forgotten in society

as towns and cities worldwide deal with fast increasing land pressures while also trying to promote more sustainable connected communities the creation of green spaces within urban areas is receiving greater attention than ever before at the same time the value of the green belt as the most prominent model of green space planning is being widely questioned and an array of alternative models are being proposed this book explores one of those alternative models the green wedge showing how this offers a successful model for integrating urban development and nature in existing and new towns and cities around the world green wedges considered here as ducts of green space running from the countryside into the centre of a city or town are not only making a comeback in urban planning but they have a deeper history in the twentieth century than many expect a history that provides valuable insight and lessons in the employment of networked green spaces in city design and regional planning today part history and part contemporary argument this book first examines the emergence and global diffusion of the green wedge in town planning in the late 19th and early 20th centuries placing it in the broader historic context of debates and ideas for urban planning with nature before going on to explore its use in contemporary urban practice examining their relation to green infrastructures landscape ecology and landscape urbanism and their potential for sustainable cities it highlights the continued relevance of a historic idea in an era of rapid climate change
